## Attitudes towards COVID-19 preventive measures

At 98% response rate, 1,618 U-Reporters from Kosovo shared their understanding of COVID-19 risks and preventive measures that they employ on a daily basis.

4 in 5 U-Reporters worry about the increase in COVID-19 cases.

Worried about COVID-19 increase? Why?

36% of U-Reporters do not see people's concerns as exaggerated, 33% say they are somewhat so, 26% think they are exaggerated, and the rest don't know.

Keep your mask on!

86% of U-Reporters believe that wearing a mask offers protection to them, to others, or both, 12% think that wearing a mask doesn't have any effect, and 2% believe that wearing a mask has a negative effect.

Do you wear a mask in public?

Which of the following measures to protect yourself from COVID-19 did you take most often in the last two weeks?

Maintain a 2 meter physical distance with others!

Wash your hands!

If a friend of yours tested positive for COVID-19, would you continue meeting them in person?

5%

5% of U-Reporters think the virus is not real.  
5% of U-Reporters think the virus is not dangerous, 2 in 3 are men.  
5% of U-Reporters have not taken any COVID-19 protective measures in the last two weeks, 4 in 5 are men.

15% of U-Reporters say they don't wear a mask, but when asked about their friends, they say 25% don't wear a mask.

2% of U-Reporters think that wearing a mask has negative effects, 3 in 4 are men.

7% of U-Reporters would meet a COVID-19 infected friend without any protective measures, all 83 of them are men.

Do you agree or disagree with these opinions?

Together, we can overcome this!

To protect yourself and others, UNICEF calls to continue taking three simple precautions:

- Wear a mask in public spaces.
- Maintain at least 2 meters physical distance between yourself and others.
- Regularly and thoroughly wash your hands with soap and water, or use hand sanitizer.
